

[LEARN ABOUT US](#)

Fks Thrives On The Three Es...

Environment

FKS is a space where the team would bend backward for a child's happiness. We create a positive environment where children will find themselves to be their best version.

In this environment, spaces are safe for learning and growing, looking inward as much as outward just like their learning. They are rugged at the same time giving groundedness to growing children

Experience

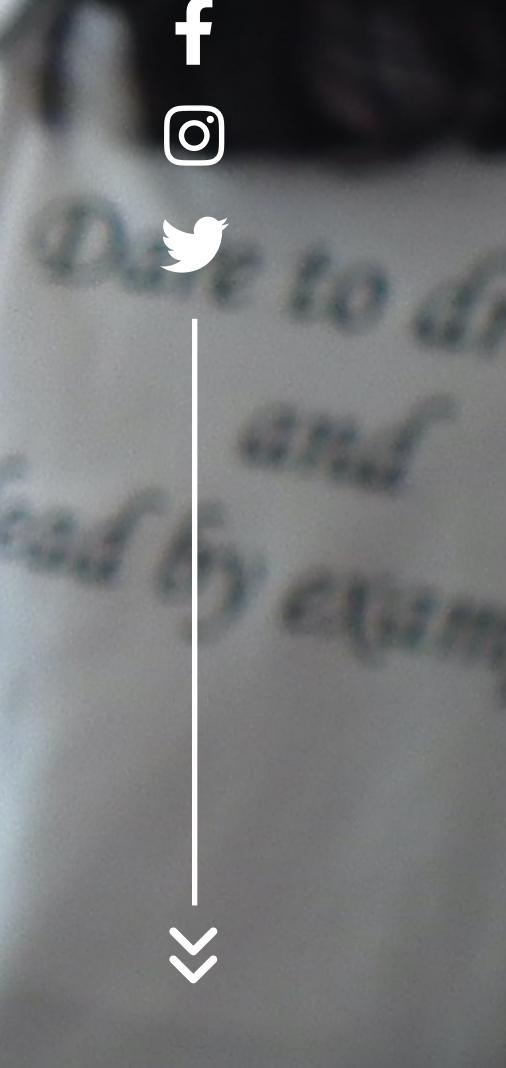

Our effort is to encourage each person to believe, love, and stand up for themselves. The FKS experience makes students believe that everybody is equal and deserves equal opportunities.

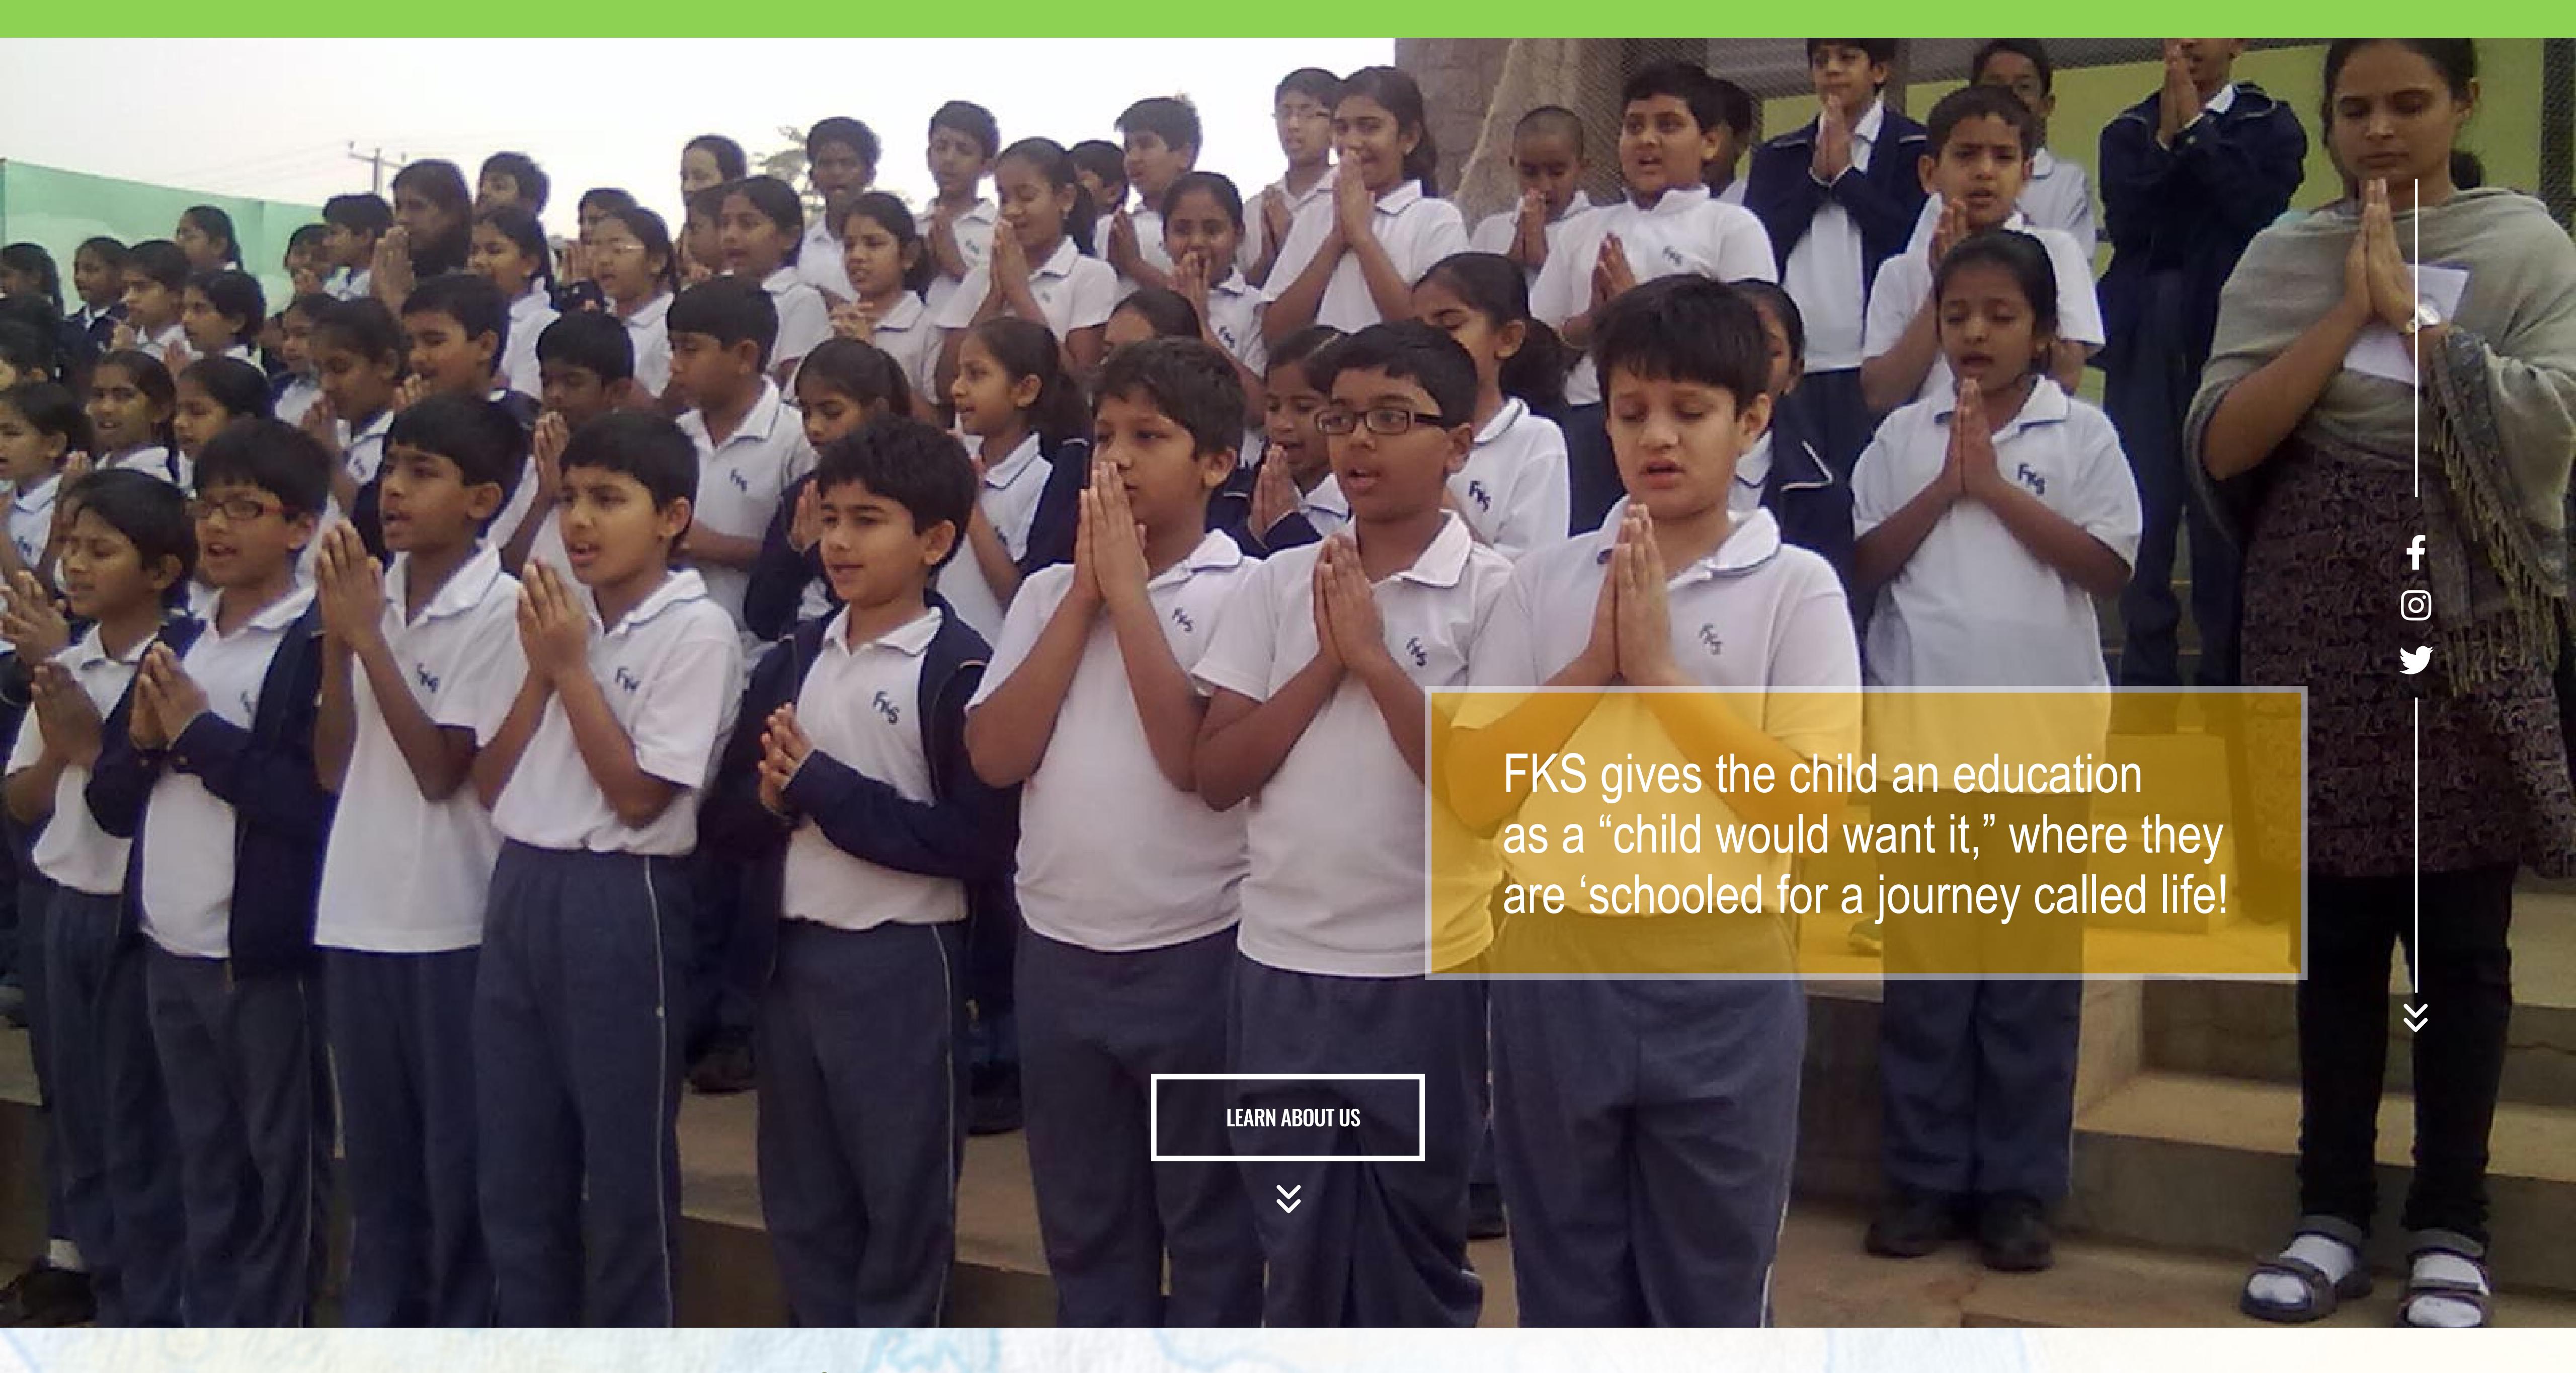

As kids, they learn to appreciate everybody around them. Students collectively experience oneness, equality, and respect from and with

Exploration

The FKS environment allows students to explore it by themselves. They learn to accept, get to voice their opinion, and make choices about their everyday situations. Hands-on learning helps students explore who they are and who they are becoming in the process. FKS does not set any benchmark, no preconceived notions but gives them an environment that is safe and non-judgemental
